

# LAM QUOC VIET

## Web Developer Intern

TP.HCM | (+84) 396 980 844 | lamquocviet2005.nvt@gmail.com

GitHub: github.com/Lamquocviet | LinkedIn | Portfolio

## Professional Summary

---

Final-year IT student with practical experience in Fullstack Web Development (ReactJS, TypeScript, Node.js, ExpressJS). Proficient in RESTful APIs, JWT authentication, RBAC, database design, and real-time features with Socket.io. Hands-on experience with Docker, Nginx, and GitHub Actions for deployment and CI/CD. Seeking a Fullstack Web Developer Internship to contribute to real-world projects and refine my skills.

## Technical Skills

---

- **Frontend:** ReactJS, TypeScript, JavaScript, HTML5, CSS3, TailwindCSS
- **Backend:** Node.js, ExpressJS
- **Databases:** PostgreSQL, MongoDB, SQL Server, Redis
- **DevOps:** Docker, GitHub Actions, Nginx
- **Tools & Concepts:** Git, Postman, Figma, RESTful API Design, JWT/Clerk, Responsive Web Design, CI/CD

## Projects

---

**Event Management — Fullstack Web Application**      *ReactJS, Node.js, ExpressJS, PostgreSQL, MongoDB, Redis, Docker, CI/CD, Nginx*

**GitHub:** <https://github.com/Lamquocviet/EventManagement>

- Developed a full-stack event management platform supporting event creation, registration, QR-code attendance, comments, ratings, and reporting.
- Implemented JWT authentication and role-based access control (RBAC) for Admin, Moderator, and User roles with granular permission management.
- Designed a multi-database architecture using PostgreSQL for transactional data, MongoDB for logs/comments, and Redis for caching and session management.
- Containerized the application with Docker and Docker Compose, using multi-stage builds, health checks, non-root containers, and Nginx as a reverse proxy.
- Built a CI/CD pipeline with GitHub Actions and Docker Hub to automate Docker image building, publishing, and deployment using Docker Compose.

**Real-time Chat Application**      *React.js, TypeScript, Node.js, MongoDB, Socket.io*

**Frontend Demo:** vercel.app | **Backend API:** render.com | **GitHub:** github.com

- Engineered a full-stack real-time messaging & P2P video calling system using WebSocket (Socket.io) and WebRTC signaling.
- Secured authentication flow using JWT Access/Refresh Tokens stored in `httpOnly` cookies with bcrypt password hashing.
- Designed an optimized MongoDB schema with targeted indexing on `participants` and `lastMessageAt`, enabling cursor-based pagination for large message histories.
- Built an Admin Control Panel with Audit Logs to manage user lifecycles, account blocks, and system statistics.
- Integrated Cloudinary & Multer for media uploads and managed global state using Zustand for instant UI updates.

## Education

---

**Ho Chi Minh City University of Education**

Bachelor of Information Technology

GPA: 3.61 / 4.0

2023 – 2027 (Expected)

## Certifications
